

Industrial Controls

Industrial Controls

Over the years Eclipse Automation Inc. is proud to have developed a truly world class team of industrial control specialists. Vertically integrated, the team has the capability to design, panel build and integrate almost any control system in common use.

- PLC Programming & Integration
- Motion Control
- CNC Control Installation
- Data collection
- Vision System Programming
- Robot and third party equipment integration

Enterprise wide control

Second to none in the industry, the Eclipse Industrial Controls group has the capability to provide not only individual machine or cell control solutions but also provide a complete enterprise wide information system.

Using internet or server based technology we can provide real time manufacturing and inventory information by directly tying in all of your plant floor machinery and warehousing into one comprehensive information system.

Essential in today's competitive marketplace these systems provide uptime, maintenance, scheduling and efficiency data and identify your manufacturing bottlenecks. Customized to suit your individual operation and requirements, we can provide you the information that enables you to maximize profit and give you the critical edge over your competition.
