

Welding

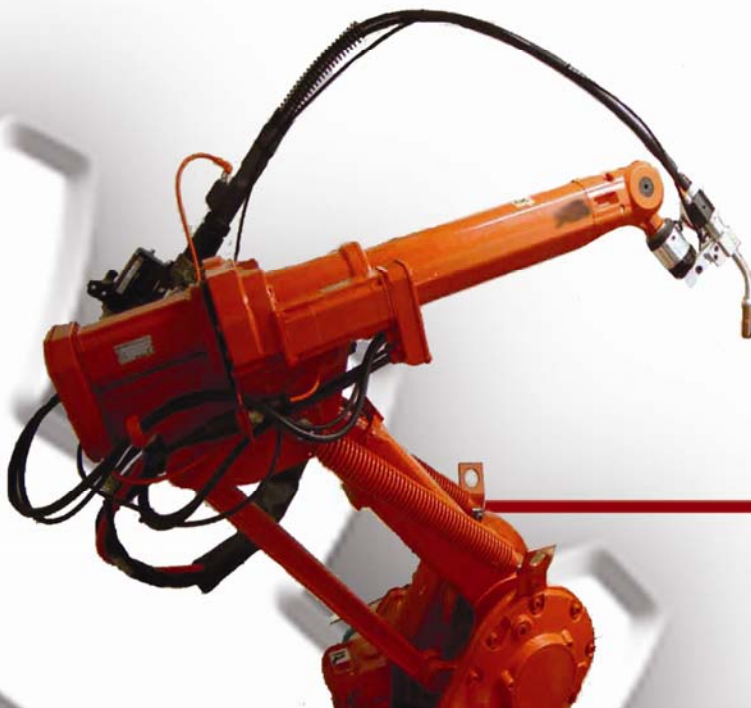

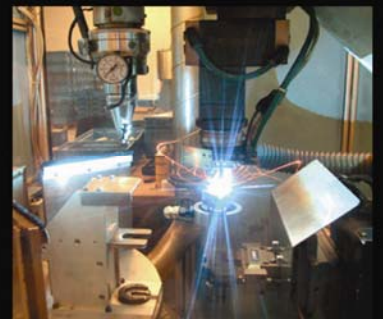

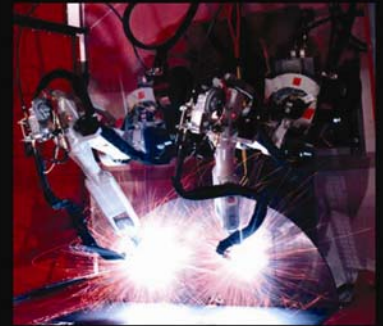

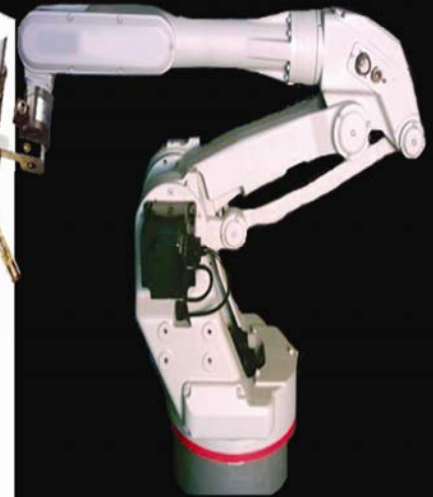

Welding

If your manufacturing process calls for welding, Eclipse Automation Inc. can provide the production equipment solution. Whether you require Mig, Resistance, Laser, Friction or even Ultrasonic welding, Eclipse's quality and attention to detail will give you the edge over your competition.

From a single cell spot welding station to complete robotic welding lines we have the capability to provide cost effective high quality solutions. We can also supply highly flexible – Lean Systems that give you all the benefits of high volume production while running only batch quantities.

Our precision weld fixtures are designed to ensure your parts are assembled correctly by incorporating weld immune sensing, anti spatter guarding and closed rod cylinders in welding positions. The selection of only the most tested and reliable components guarantees that our equipment will be up and running to allow you to ship on time – every time.

A highly trained sales and applications engineer will be pleased to review your application and advise on the most cost effective way to produce high quality welded assemblies. Find out today how we can boost your bottom line - you will be glad you did!
